SUMMARY

Full-stack MERN developer skilled in React.js, Next.js, Node.js, Express.js, and TypeScript, building REST APIs and responsive UI with Tailwind CSS across SQL and NoSQL databases. Collaborates via Git/GitHub and has shipped multiple live production apps.

WORK EXPERIENCE

House of UD | Full-Stack Developer

Jan 2026 – Present

- Designed, developed, and maintained multiple responsive, reusable UI components and landing pages for brand clients including the Barber Syndicate e-commerce platform using Next.js and React.
- Built and deployed a cross-platform e-commerce mobile application for Barber Syndicate using React Native (Expo), integrating product listings, cart, and order management.
- Managed web hosting infrastructure via cPanel and VPS, handling server configuration, deployments, and uptime reliability.
- Worked with PostgreSQL, MySQL, and Prisma ORM for data modeling and backend REST API development, collaborating with the team via Git and GitHub including code reviews.
- Received a Pre-Placement Offer (PPO) after the first month of internship based on performance.

Spycore Systems | Full-Stack Developer Freelancer

Jun 2025 – Dec 2025

- Designed and developed a secure Digital Malkhana System using Next.js, PostgreSQL and Prisma.
- Implemented JWT-based authentication and role-based access control for secure access across departments.
- Built and deployed Dockerized PostgreSQL and backend services on VPS, improving reliability and scalability for multi-district usage.
- Enabled digital tracking of seized property across 15+ districts, reducing manual record handling and improving audit readiness.

SKILLS

Frontend: React.js, Next.js, React Native (Expo), TypeScript, JavaScript (ES6+), Tailwind CSS

Backend: Node.js, Express.js, REST API Design, JWT Authentication

Databases & ORM: PostgreSQL, MongoDB, MySQL, Prisma ORM

DevOps & Tools: Git, GitHub, Docker, Linux CLI, VPS Deployment, cPanel, Firebase, Supabase

Programming: JavaScript, TypeScript, Java, Python, SQL

PROJECTS

DevTools | Next.js, TypeScript, ShadCN, Framer Motion

Feb 2026 – Present

- Built a multi-utility web platform offering 15+ developer tools including JWT decoders, hashing utilities, and financial calculators.
- Architected a reusable, type-safe component library with ShadCN and Tailwind CSS, ensuring a consistent design system across all tools.
- Engineered smooth, accessible UI interactions with Framer Motion, improving usability and user engagement across tool pages.

[Live](#) [Source Code](#)

Solar CRM | Next.js, TypeScript, Prisma, PostgreSQL

- Built a production-grade multi-tenant Solar CRM for a solar panel agency to manage customers, franchise partners, and admin operations, using Next.js, TypeScript, Prisma, and PostgreSQL with a scalable relational architecture and end-to-end type safety.
- Implemented secure role-based multi-tenancy and access control, ensuring strict tenant-level data isolation and preventing unauthorized access through centralized server-side authorization and fail-closed data filtering.
- Engineered secure authentication and transactional data processing using custom JWT authentication, Zod validation, and Prisma transactions with shared business logic, ensuring reliable data integrity across client and server operations.
